2	Morning Brews & High-Protein Breakfasts	25
3	High-Protein Batch Meal Preps	25

Every recipe in both volumes was checked against the storehouse order list, and against the ratios a kitchen runs on — the water in a dough, the leavening in a cup of flour, the eggs in a custard, a doneness cue on every piece of chicken.

The number beside each one is its nutrition score out of a hundred: protein, calories, fat, sodium and fiber. It measures that and nothing else.

The companion volume is **Around the Table**.

BISHOPS' STOREHOUSE RECIPE BOOKS

Run and Not Be Weary

*One hundred recipes built on protein, fiber and staying full,
from what the storehouse actually carries. Every one
carries real macros and a computed nutrition score.*

VOLUME ONE OF TWO

Every recipe here is built on what the Bishops' Storehouse order list actually carries. Where one needs something beyond it, the line at the foot of the recipe says so.

Calories, protein, carbohydrate and fat are as recorded for Run and Not Be Weary and worked out from the ingredients everywhere else. Sodium and fiber are worked out from the ingredients throughout. How the score is arrived at is on the next page but one.

SET IN SOURCE SERIF 4 AND WORK SANS · 2026

How to read a recipe

Everything here is built from what the storehouse actually carries.

THE NUMBER

Every recipe has one, running from 001 straight through both volumes. The contents at the front of each book lists them in order with its page.

EFFORT

Easy	No real cooking, or one pan and a few minutes.
Medium	A hot stove and some timing, but nothing that can go badly wrong.
In-depth	An afternoon, or a long slow oven, or a technique worth learning.

THE LINE UNDER THE TITLE

Servings, time, effort, and a nutrition score out of 100. Five things make it up: how much of the energy comes from protein (30 points, full marks at 45%), how many calories a serving carries (20, full marks up to 300), how much of the energy comes from fat (10, full marks at or below a tenth), how much sodium a serving carries (25, full marks to 300 mg and nothing left by 1,200), and how much fiber (15, full marks at 7 g).

Sodium and fiber are worked out from the ingredients rather than measured, in both volumes. Canned goods carry the salt; that is most of what the sodium figure is telling you.

It measures one thing only. A high score does not mean a dish is good, and a low one does not mean it is bad — a plate of fudge scores badly and is still fudge. Whether a recipe needs anything beyond the standard order is a separate question, answered on the line at its foot.

ALSO NEEDS

The line at the foot of each recipe. Either it says everything is on the standard list, or it names exactly what is not, so you know before you start rather than halfway through.

SERVINGS

Written for a household. Halving or doubling most of these is safe; baking is the exception, where the ratios are doing real work.

Temperatures and doneness

Colour is not a reliable guide. A thermometer in the thickest part is.

165°F	Chicken and turkey, every cut, and anything reheated
160°F	Ground beef and ground pork; egg dishes and casseroles
145°F	Whole cuts of beef and pork, then rested three minutes
40–140°F	The range food should not sit in. Two hours out is the limit.

Chicken is the one to be careful with. A crisp crust, clear juices or a long time in the oven are not proof it is done — thick breasts under a sauce take far longer than they look. Where a recipe cooks chicken, it says what to check for.

OVENS LIE

Most run hot or cold by a good margin. Check five minutes before the stated time the first time you make something, and write the real time in the margin.

Weights and swaps

One cup, level, unpacked unless it says otherwise.

125 g	Flour, one cup
200 g	Granulated sugar, one cup
220 g	Brown sugar, one cup, packed
120 g	Powdered sugar, one cup
227 g	Butter, one cup — two sticks
80 g	Rolled oats, one cup
244 g	Milk or water, one cup
7 g	Yeast, one packet — 2¼ teaspoons
